

MD MAHAFUZUR RAHAMAN

Senior WordPress Plugin Developer

m.mahfuz.me@gmail.com | +8801602494336 | [WordPress.org Profile](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Senior WordPress Plugin Developer with 6+ years of specialized experience architecting and shipping production-grade plugins for SaaS products with 10,000–1,000,000+ active installations. Expert in React.js/TypeScript frontend development, RESTful API integration, and building scalable, maintainable plugin architectures.

Proven ability to lead full plugin lifecycle from ground-up development and major refactors to third-party API adoption and cross-version backward compatibility. Track record of measurable impact: 40% performance gains, 30% reduction in development overhead, and 4.2 → 4.7 star stability improvements.

CORE COMPETENCIES

Plugin Architecture & Development

- WordPress Plugin Lifecycle (concept → launch → maintenance)
- Custom Hooks & Filters API, WP REST API
- SaaS plugin patterns & codebase refactoring
- Backward compatibility across major WP releases
- WooCommerce integration & extension development
- Elementor API & custom widget development

Backend & Data

- PHP 7.4+, OOP patterns, PSR standards
- MySQL & custom database schema design
- Third-party API integration (Google Sheets, Cloudflare, etc.)
- Real-time data sync architecture
- Query optimization & page-load reduction

Frontend

- React.js, Redux, TypeScript
- Custom Gutenberg Blocks & admin dashboards
- JavaScript ES6+, jQuery, Sass/Less
- Pixel-perfect Figma-to-code implementation
- Performance optimization & lazy loading
- Intuitive UX for plugin settings interfaces

Tooling, Workflow & AI Coding

- Git, SVN, npm, Composer, WP-CLI, Docker
- Code architecture & reusable component design
- Plugin release management & versioning
- Internal technical documentation
- Claude Code, GitHub Copilot, Cursor AI
- AI-assisted code generation, review & refactoring
- Agentic task automation & multi-step AI pipelines

PROFESSIONAL EXPERIENCE

Senior WordPress Developer • **WPPOOL** Mar 2022 – Present | Full-Time Remote

Lead plugin developer responsible for full-lifecycle ownership of multiple WordPress SaaS plugins, from architectural decisions through production release and ongoing iteration.

- **Sheets to WP Table Live Sync** Architected and led development of
 - Scaled to 10,000+ active installations; the flagship plugin in WPPool's SaaS portfolio
 - Engineered real-time Google Sheets ↔ WordPress sync with robust conflict handling
 - Full plugin revamp with React-based dashboard and real-time Google Sheets sync. 10,000+ active installs.

- ▶ **improved plugin performance by 40%** Spearheaded a complete codebase refactor that
 - Introduced reusable component architecture that cut future feature development time by 30%
 - Established coding standards adopted across all WPPOOL plugin projects
- ▶ **React.js + TypeScript admin dashboards** Built enterprise-grade
 - Designed and delivered all frontend interfaces independently, ensuring intuitive UX and seamless API integration
 - Dashboards now serve as the UI foundation for multiple WPPOOL plugin products
- ▶ **Easy Cloudflare Turnstile** Engineered
 - Developed plugin from scratch at Cloudflare's initial API release, positioning WPPOOL as an early adopter
 - Achieved 5,000+ installations within the first quarter of launch
 - Ground-up development integrating Cloudflare's spam-protection API. 5,000+ installs in Q1 launch.
- ▶ Maintained backward compatibility and feature parity across 3 major plugin releases while shipping 15+ new features

WordPress Developer • WPDeveloper Sep 2019 – Apr 2022 | Full-Time

Core developer for one of the WordPress ecosystem's most-installed Elementor extensions, responsible for new feature delivery, bug resolution, and frontend architecture.

- ▶ **Essential Addons for Elementor (1M+ active installations)** Core developer for
 - Integrated 20+ Elementor add-ons including advanced form builders, pricing tables, and dynamic content widgets
 - Contributed to growing the plugin to one of the most popular Elementor extensions on WordPress.org
- ▶ **improving plugin stability from 4.2 to 4.7 stars** Resolved 200+ bugs and performance issues,
 - Systematic debugging approach adopted as team standard for issue triage
- ▶ **Templately plugin development** Contributed to
 - Built React.js-powered template library management system used by hundreds of thousands of users
 - Implemented pixel-perfect UI components from Figma specs in close collaboration with the design team
- ▶ **reducing average page load time by 25%** Optimized database queries,
 - Impact most significant on high-traffic installations with large post counts and complex queries

Junior WordPress Developer • WPDeveloper Jun 2018 – Sep 2019 | Full-Time

Joined as a junior developer, building WordPress plugin fundamentals and contributing to one of the ecosystem's flagship Elementor extensions.

- ▶ Maintained plugin compatibility with WordPress core API changes across 15+ major releases
- ▶ Debugged and resolved 100+ reported issues in production plugins, improving code quality and reducing support backlog
- ▶ Assisted senior developers implementing new features for Essential Addons for Elementor
- ▶ Authored and maintained internal development process documentation

INDEPENDENT PROJECT

Product Quotations for WooCommerce • **Personal Plugin** 2020 – Present

Independently developed, launched, and maintained a WooCommerce extension for product quote and RFQ (request-for-quote) management.

- ▶ Sole developer responsible for the full product lifecycle: architecture, feature development, releases, and versioning
- ▶ Built a custom admin interface and frontend forms for an end-to-end quote management workflow
- ▶ Manages customer support and bug fixes; demonstrates direct accountability for product quality
- ▶ Practical testbed for exploring WooCommerce integration patterns, custom post types, and plugin UX — insights applied across professional work
